Scientific Computing

The European Open Science Cloud

*What is it and why should universities
get involved?*

Juan Bicarregui

STFC Scientific Computing Dept.

Coordinator EOSCpilot (2018-19)

Member EOSC Executive Board (2019-20)

Overview

- 1 The EOSC vision in pictures (a personal view)
- 2 History
- 3 Current activities
- 4 Why get invovled

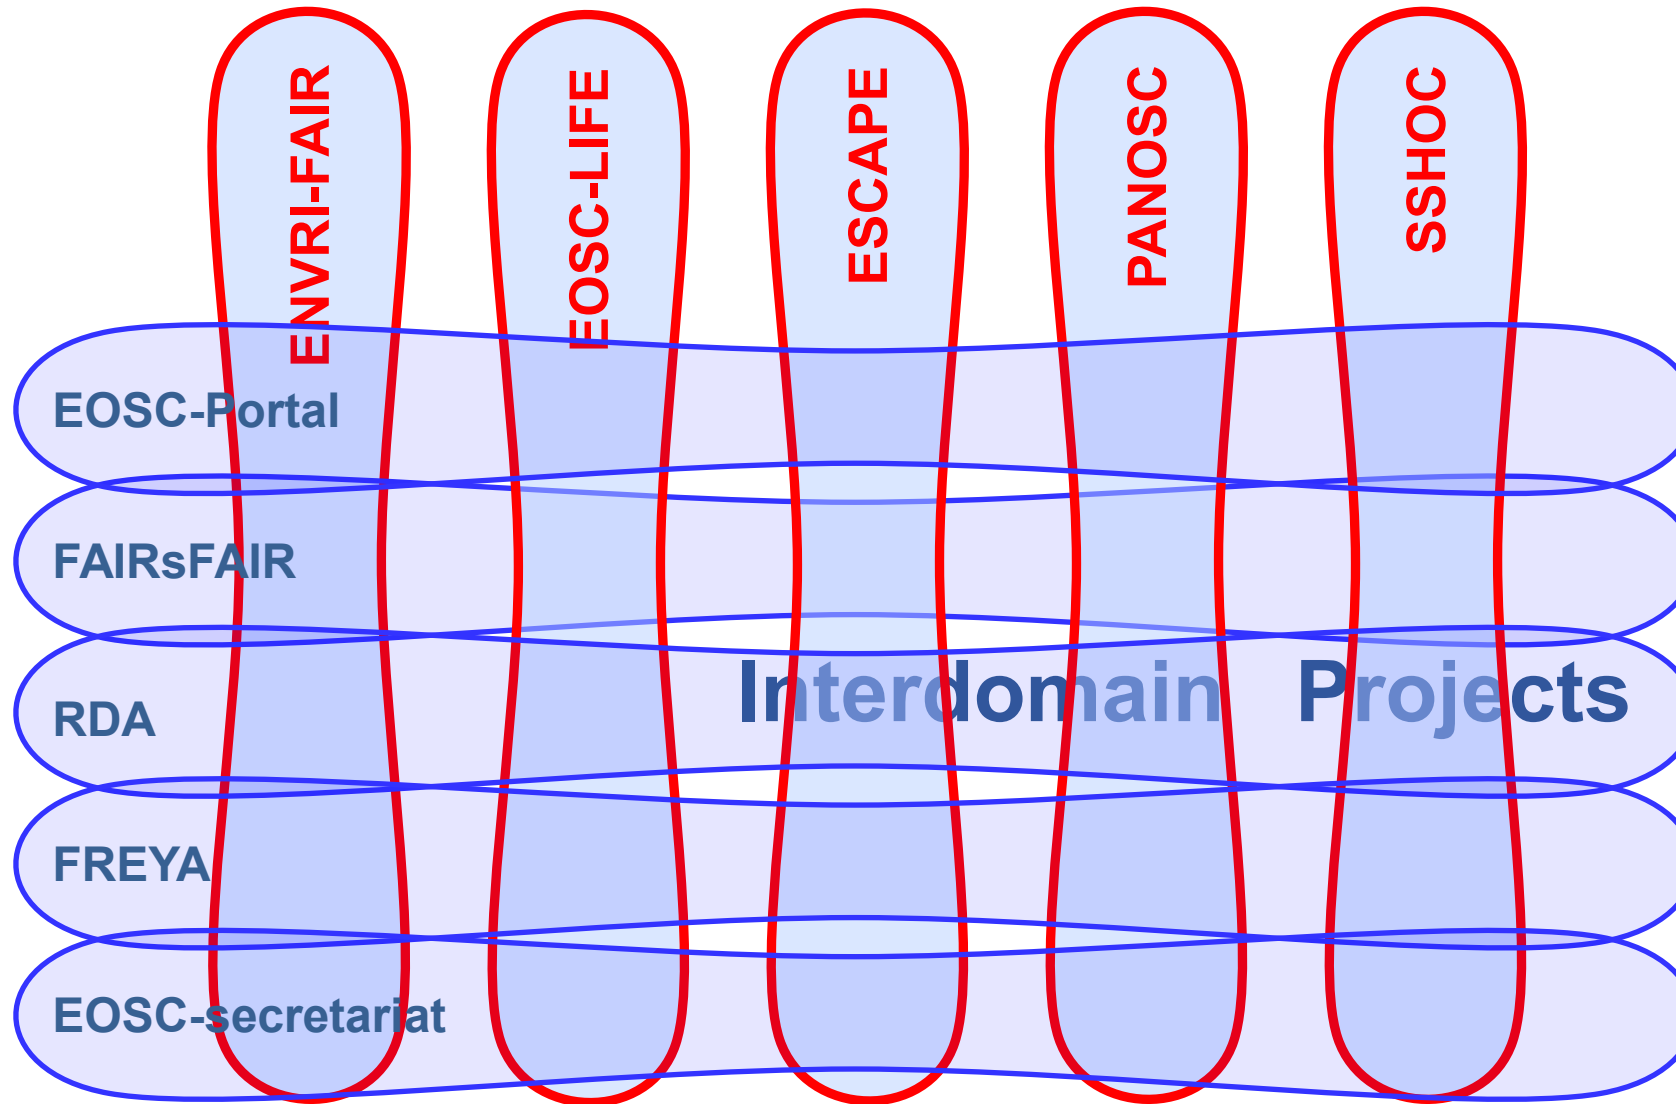

Data storage tape robot at RAL

**EOSC is NOT
a big data storage cloud**

Previously: Horizontal and Vertical infrastructures

Currently: Vertical Domain Clusters and Horizontal Technology Projects

Next: Sharing across vertical domains

Domain Specific user environments

Inter-domain Catalogue of Data and Services

**Greater sharing of
Resources and Data
across RIs and els**

Zooming in....

**Domains “clustered” using
EOSC**

Zooming in:

Horizontals Cooperating and Integrating

Inter-domain Catalogue of Services

Web of provenanced FAIR data

Methods/Software/Workflows

Cross disciplinary e-infrastructure

Eventually: shared data and services with domain focused portals

Overview

1 The EOSC vision in pictures (a personal view)

2 History

3 Current activities

4 Why get involved

EOSCpilot (2017-18)

Three types of challenges:

Scientific Challenges are really *Opportunities*

• **Scientific Challenges:** deploying the EOSC to deliver Open Science

Technical Challenges are *Barriers to overcome*

▪ **Technical Challenges:** developing technical solutions that meet the scientific needs

Cultural Challenges are also *Barriers*

• **Cultural Challenges:** adopting new, more open ways of working

H2020 WP 2018-20 INFRAEOSC

€250 million to prototype components of the EOSC (about 30 projects)

Overview

2 History

3 Current activities

4 Why get involved

Current Horizon Europe programme

Destination **INFRAEOSC**: Enabling an operational, open and FAIR EOSC ecosystem

Aims:

- **Develop EOSC** in a cohesive manner and **operationalize it** realizing the vision of a web of FAIR data and services for science.
- Consolidate the role of EOSC as a **data space for science, research and innovation**, articulated with the other data spaces set forth in the [European Strategy for Data](#).

Expected Impact:

- **Mainstream open science practices** among researchers (initially), enabling the wide and early sharing of research outputs (publications, data, software, etc.) within and across disciplines.
- Enable the **seamless access to and management of increasing volumes of data** and ensure that they are **as FAIR and as open as possible**.
Increase the **FAIRness** and **openness** of research data in Europe.

“The ambition of EOSC is ...

...to provide
European researchers, innovators, companies and citizens
with a
federated and open multi-disciplinary environment
where they can
publish, find and re-use data, tools and services
for
research, innovation and educational purposes.”

[https://ec.europa.eu/info/research-and-innovation/strategy/strategy-2020-2024/our-digital-future/open-science/european-open-science-cloud-eosc_en, 24/10/21]

“...a virtual environment
with
free at the point of use, open and seamless services
for
storage, management, analysis and re-use of research data,
across borders and scientific disciplines.”

[EOSC Implementation Roadmap (March 2018)]

How?

- A co-investment (with in kind and financial contributions) by the EU and non-EU partners
 - at least €1 billion is foreseen for the next 7 years.
- The EOSC Association was setup in July 2020 as an AISBL under Belgian law
 - about 150 members and 50 observers

The current phase of implementation (2021-2030), is taking place in the context of the [EOSC European co-programmed partnership](#) launched at the [Research and Innovation Days 2021](#) and according to a [Strategic Research and Innovation Agenda](#) (SRIA) which is co-developed with the entire EOSC community.

HE RI WP – Topics under Destination INFRAEOSC

Watch later

Research Infrastructures Work Programme

Destination #2: INFRAEOSC*

2021

- EOSC-ready digitally skilled workforce
- Supporting the EOSC Partnership: engagement, strategic agenda
- Deploying EOSC-Core components for FAIR
- Innovative and customisable services for EOSC
- Enabling discovery and interoperability of federated research artefacts across communities
- FAIR & open data in support of cancer research

2022

- Services and tools to underpin a research assessment system that incentivises OS practices
- Improving & coordinating technical infrastructure for institutional OA publishing
- FAIR & open data in support of healthy oceans, seas, costal and inland waters
- Support for initiatives helping to generate global standards, specifications and recommendations for open sharing of FAIR research data, publications and SW
- Other actions: Delivering the EOSC core infrastructures and services (public procurement)

Overview

1 The EOSC vision in pictures (a personal view)

2 History

3 Current activities

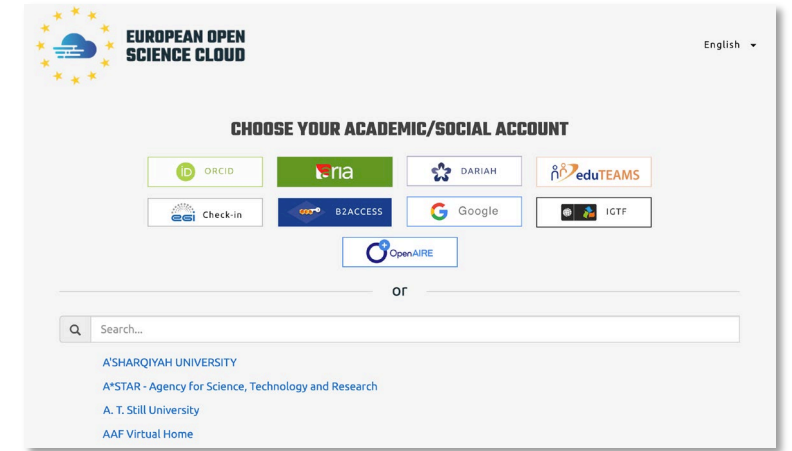

4 Why get involved

Why Get Involved?

- EOSC is a major initiative in Horizon Europe
 - €1 billion in Horizon Europe
- UK Researchers continue to collaborate internationally
 - through whatever schemes are available
- UK is developing its own Digital Research Infrastructure
 - Will need to interoperate with other Global Research Commons
- Open Science is becoming the new normal
 - Open Access, Open Data, Open Software,

What can you do now?

- Have a look at the EOSC portal
federated sign on

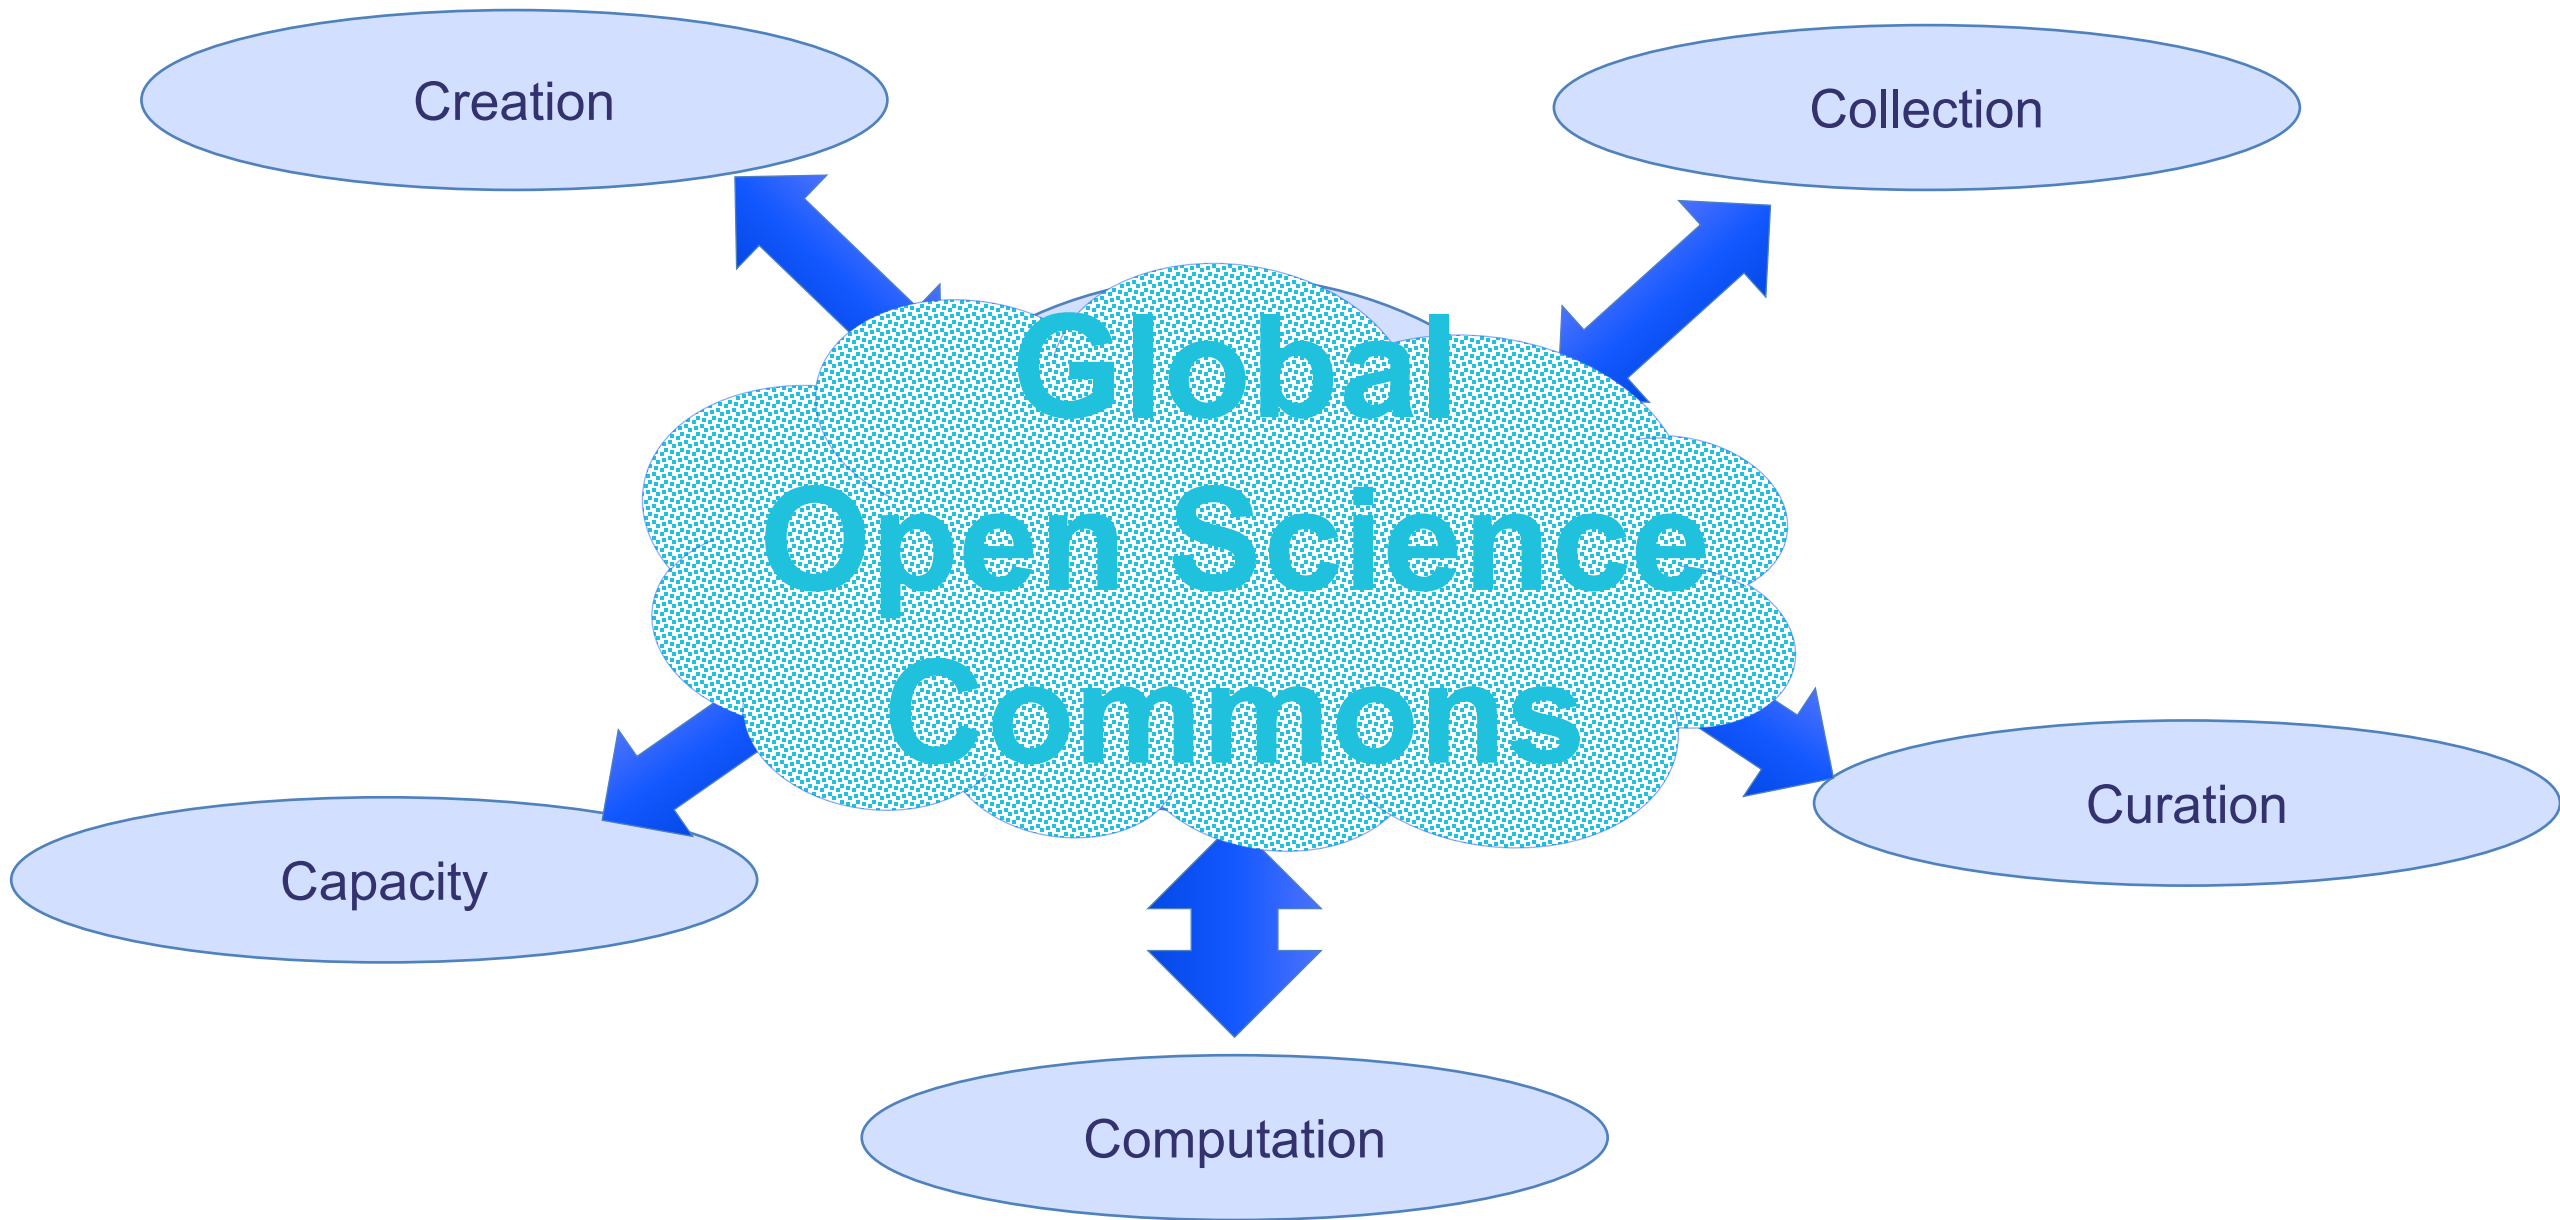

- *Sign up to EOSC Liaison Platform*
***EOSC-Secretariat.eu** (ending soon)*

- *Maybe join the EOSC Association or Task Forces*
www.eosc.eu

- *Look up the “Destination EOSC” programme*
HORIZON-INFRA-2022-EOSC
4 Grants Close April 2022, more to follow
